Hossein NooriAzad

Senior Software Engineer – Tech Lead - .NET

P +989100849101 E h.nooriazad93@gmail.com L LinkedIn.com/hnooriazad

SUMMARY

Senior Software engineer with 9+ years of experience in building scalable microservices and backend systems. Expert in C#/.NET Core, SQL Server, PostgreSQL, MongoDB, and Redis. Skilled in MediatR, AutoMapper, CQRS, Docker, and CI/CD. Strong background in microservices, Clean Architecture, Monolithic and DDD, with a focus on performance, security, and scalability.

KEY SKILLS

- **Language:** C#.
- **Frameworks and Architectures**: .NET, .NET Core, ASP.NET MVC, WPF Webform, Winform, Microservices, Clean Code, CQRS.
- **Databases:** MS-SQL Server, MySQL, PostgreSQL, MongoDB, Redis, PL/SQL(Oracel).
- **Tools and Technologies:** EF, Unit-Test, Logging (NLog, SeriLog), Docker, RESTful API, OOP, RabbitMQ, SOLID, Git, AWS S3, CI/CD, IIS, Training and Mentorship, MediatR, SignalR, DevExpress.
- **Methodologies:** Agile, Scrum, Waterfall

EXPERIENCE

Senior Software Engineer at FadakTrains.com | Oct 2023 - Present

- Lead the Hotel and Tour Team, spearheading the development of new features like Hotel booking, boosting company revenue by around 30%.
- Successfully implemented the backend for Hotel and Tour services, seamlessly integrating with existing services like Identity and Train services.
- Supervised a 4-member technical team comprising two backend developers and two frontend developers.
- Managed task allocation, coordinated with the product manager, and collaborated with UI/UX interface for seamless implementation of business features.

Technical Lead at IWand.Style | Nov 2022 - Nov 2023 (12 months)

- Orchestrated and implemented application based on a monolithic modular architecture with .NET 7, incorporating Identity-Server, AWS S3, MinIO, RabbitMQ Event Bus, and Logger Services.
- Leveraged MongoDB and PostgreSQL for efficient data processing in collaboration with the AI domain.
- Achieved over 90% improvement in search response times by fine-tuning queries meticulously.
- Led training sessions for junior developers, aligning their skills with company objectives.

.NET Developer at IranEIT | Feb 2021 – Dec 2022 (22 months)

- Contributed to a comprehensive .NET microservices solution for the Iran insurance sector, involving 200+ projects.
- Iteratively enhanced functionality, aligning features with overarching business objectives.
- Collaborated with analysts to address project issues, applying SOLID principles for improved efficiency.
- Spearheaded the training of junior developers, fostering a cohesive and proficient team.

Backend Developer at Chalka | Oct 2020 - Feb 2021 (5 months)

- Spearheaded the integration of a web application with a mobile application, deploying over 30 RESTful APIs.
- Developed an ASP.NET webform application for the management of information related to the Arbaeen procession.

.NET Developer at Shygun System | Feb 2018 - Nov 2020 (34 months)

- Implemented C# Windows applications and .NET projects, focusing on warehousing, accounting, and branch management.
- Employed DevExpress WinForms for the HESABGAR: STORES product, optimizing store efficiency.
- Engineered plugins and web services for seamless E-Commerce integration, creating 100+ web APIs.
- Introduced SignalR for real-time online data capture, enhancing data collection and analysis efficiency.

SQL Developer at ITDP Rose | Jun 2016 - Feb 2018 (21 months)

- Enhanced SQL procedures and functions for reporting services on accounting, HRM, and payroll software.
- Orchestrated the design of databases for business, fostering collaboration with Iran Railways.
- Optimized database performance, resulting in a 20% increase in system report speed.

EDUCATION

Bachelor of Software Engineering· **(2011 - 2015)**

Arak University (Arak-Iran)
